PROFESSIONAL SUMMARY

Network & System Administrator and Cybersecurity professional with hands-on experience in ISP infrastructure (OLT/ONU, MikroTik, GenieACS/TR-069), Linux administration, network monitoring, and vulnerability assessment and penetration testing (VAPT). Holds ISC2 CC and Fortinet FCA certifications. Skilled at troubleshooting real-world network and server issues, automating tasks with Python, and hardening systems.

CORE SKILLS

Networking & ISP: MikroTik, OLT/ONU/ONT, FTTH Provisioning, GenieACS, TR-069, Routing, Switching, DHCP, DNS, VPN, SSH

System Administration: Linux, Bash, FreePBX, Asterisk (VoIP), Naemon, Thruk, Network Monitoring, SNMP, RRDTool

Security Testing (VAPT): Burp Suite, OWASP ZAP, Nessus, OpenVAS/GVM, Nmap, Nikto, Metasploit, SQLMap, WPScan, Wireshark

Wireless & Password Security: Aircrack-ng, Hashcat, John the Ripper, Hydra, tcpdump

Digital Forensics: Autopsy, FTK, Volatility, NetworkMiner, Bulk Extractor

Reverse Engineering: Ghidra, IDA, GDB, Pwndbg, Pwntools, x64dbg

Programming & Automation: Python, Netmiko, C, JavaScript, Bash, REST API, Postman

Frameworks & Concepts: Vulnerability Management, Risk Management, System Hardening, ISO/IEC 27001:2022, Threat Intelligence

PROFESSIONAL EXPERIENCE

Network / System Administrator | HashCnet Pvt. Ltd | Nov 2025 – Present

- Manage ISP network devices including OLT, ONU, and MikroTik routers in a live production network.
- Provision FTTH customers and manage remote devices using GenieACS and TR-069.
- Administer Linux servers and automate network tasks using Python and Netmiko.
- Test and validate APIs using Postman.
- Monitor network health with Thruk and Naemon, and maintain VoIP services using FreePBX and Asterisk.

Network Security Intern | Cube Technologies Pvt. Ltd | Jun 2025 – Sep 2025

- Identified and analyzed vulnerabilities in real environments using OpenVAS, Nessus, Wireshark, and Burp Suite.
- Performed wireless penetration testing with Aircrack-ng, Hashcat, and Wireshark to evaluate WPA/WPA2 security.
- Conducted web application VAPT using Burp Suite, OWASP ZAP, Nmap, Nikto, and Metasploit, and prepared vulnerability reports.
- Assisted in configuring routing, switching, DHCP, and VPN services to improve network performance and security.

PROJECTS

Custom Network Monitoring System with Naemon

- Built a monitoring platform covering SNMP data collection, processing, efficient storage with RRDTool, and presentation through a web interface.
- Write-up: medium.com/@alishmaharjan90/building-a-custom-network-monitoring-system

USB Device Monitoring and Data Transfer Prevention Framework

- Developed a framework using forensic analysis and access control to monitor USB devices and prevent unauthorized data transfer.
- GitHub: github.com/alishmaharjan/USB-Monitoring-System

Thruk Multi-Backend Monitoring Web Interface

- Configured Thruk as a single web interface across multiple monitoring backends.
- Write-up: medium.com/@alishmaharjan90/thruk-8f283b7077ce

CERTIFICATIONS

- Certified in Cybersecurity (CC) – ISC2
- Fortinet Certified Associate in Cybersecurity (FCA) – Fortinet, valid 2026–2028
- ISO/IEC 27001:2022 Lead Auditor – Mastermind
- Networking Essentials – Cisco, 2025
- Certified Threat Intelligence & Governance Analyst (CTIGA) – Red Team Leaders

EDUCATION

Bachelor's Degree in Ethical Hacking and Cybersecurity | Softwarica College of IT | 2022 – 2025

High School, Science (Physics) | D.A.V College | 2021 – 2022

ACTIVITIES

- Participant in CTF competitions and hackathons
- Completed Network Security training
